Minimum S.H. Required for Degree 121

¹Required to declare. C or better grade, B or better grade in CSDI 2100 and ENGL 3760.

The undergraduate program emphasizes the normal processes of speech, hearing, and language and allows the student to explore other academic areas of interest. Since the master's degree is the minimum level of preparation for persons seeking professional careers in this field, the BS degree does not qualify the student to work professionally but is designed to prepare the student for graduate studies. Admission to the university does not assure admission to the program. Students are initially admitted to the General College. In order to be considered for admission to the program, the student must have a minimum cumulative 3.0 GPA and must have completed CSDI 2100 with a minimum grade of B (3.0), and be interviewed prior to formal admission into the program. These requirements are generally completed by the end of spring semester of the sophomore year. Majors must maintain a cumulative 3.2 GPA for all required CSDI courses. A major earning a D (1.0) in any CSDI course must petition the Department of Communication Sciences and Disorders for probationary continuation and will be required to repeat the course.

All guides are meant as an example of how a degree can be completed. However, individual plans will be developed for each student in consultation with the academic advisor. Course availability, prior credit, course prerequisites, major requirements, and student needs must be considered in developing the individual academic pathway.
