Minimum S.H. Required for Degree 120

¹Fall, ²Spring, ³Summer

To declare a major in the Nutrition with Science (NS) option, students must have at least a 2.5 GPA.

*The lab for this course does not have a CAA equivalent. Only 3 credits will transfer to ECU for BIOL 2110 = BIO 175. Students must take BIOL 1111 at ECU for 1 s.h. or discuss other available options with faculty.

Students preparing for entry into graduate health professional schools or programs including Medicine, Dentistry, Physical Therapy, Pharmacy, and Optometry should check with specific schools to see if prerequisite coursework completed at a community college is eligible for admission.

Students who complete foundation curriculum at the community college through a North Carolina Comprehensive Articulation Agreement AA or AS degree may be required to take additional courses to maintain full-time status. Additional courses taken to maintain full-time status may result in a 50% tuition surcharge, which occurs after the student has completed 140 s.h. For more information about this, please contact an academic advisor or the Office of the Registrar.

All guides are meant as an example of how a degree can be completed. However, individual plans will be developed for each student in consultation with the academic advisor. Course availability, prior credit, course prerequisites, major requirements, and student needs must be considered in developing the individual academic pathway.
